Profile

Hi, I'm Jonathan Ixcayau, a passionate mobile developer with over 5 years of experience in mobile development. I specialize in SwiftUI, Flutter, Kotlin, Jetpack Compose, and I love creating and supporting mobile applications. I have a strong background in iOS development with solid Swift programming skills, and I excel in building iOS applications connected to RESTful APIs.

I enjoy mentoring junior developers and managing technical debt, and I work well both independently and in teams to design, implement, test, and support software applications. I have a deep understanding of mobile UI design principles, patterns, and best practices, and I'm proficient in version control systems like GIT

Work experience

11/2020 – present
Guatemala

Senior mobile developer Agropecuaria Popoyán S.A.

As an experienced mobile application developer, I have successfully designed and developed the Agriconecta app for Android and iOS platforms, integrating Huawei mobile services and publishing updates on Playstore and AppStore. With proficiency in Flutter, I collaborated with a team to create an intuitive app for farmers, providing easy access to crop prices and weather forecasts. Utilizing marketing techniques, I achieved a significant increase in downloads and ensured a smooth release by resolving any issues during the app submission process. By analyzing app store performance data, I made data-driven decisions resulting in increased user engagement and satisfaction.

12/2021 – 08/2022
Guatemala

Mobile developer Tribal Worldwide Guatemala

Experienced mobile app developer proficient in various programming languages, including Dart, Java, Swift, and Kotlin. Successfully launched multiple apps on Android and iOS platforms, utilizing modern development tools like Firebase and Git. Skilled in collaborating with cross-functional teams, implementing design patterns, code optimization, and testing methodologies. Passionate about creating innovative and efficient solutions, committed to staying up-to-date with the latest mobile app development trends. Developed Coffee shop app using Jetpack Compose and provided support for existing Android and Flutter apps.

11/2019 – 11/2020
Guatemala

Android developer Digital Geko

I developed and implemented secure login feature, intuitive interface, and cutting-edge security measures for banking mobile apps. Optimized app performance by identifying and resolving technical issues. Refactored banking mobile app for a national bank and implemented a module to create accounts for a Salvadoran bank. Also integrated Huawei mobile service to existing apps.

08/2019 – 06/2020
Guatemala

Full stack developer Inédito

I developed a fully-functional Flutter application from scratch, delivering an exceptional

Work experience

user experience on both Android and web platforms.
Part of the app developed I utilized Node.js and Firebase cloud functions to proficiently handle backend development tasks, ensuring seamless connectivity and efficient data processing.

Skills

- FRONTEND MOBILE			
Flutter	Android Java	Android Kotlin	Android Jetpack compose
Swift UI			
- GOOGLE SUIT			
Firebase	Firebase Auth	Firestore	Storage
Remote Config	Crashlytics	Hosting	Analytics
Test Lab	App Disribution	Big Query	
- STORE DEPLOYMENT			
AppStore	PlayStore	AppGallery (Huawei)	
- BACKEND			
Node JS	Deno		
- THIRD PARTY SERVICES			
One Signal	Amplitude	Google Maps	Apple Maps
Petal Maps	Sentry	GraphQL	AdMob
Facebook Auth	Twitter Auth	Apple
